

Firm license renewals due now!

The firm registration renewal period runs from May 1 through June 30 each year. To access your firm's renewal application, please sign in to the [LSBAE Licensing Portal](#) and select the "Firm Profile" tab in the blue header at the top of the page. You can then update "Point of Contact" to begin your application.

Renewal applications must be submitted with payment by June 30, 2026. Applicants can pay in one of several ways: with a credit card, a check (payable to LSBAE) mailed to the board office, or, new this year, an ACH payment through your bank. Paper applications are no longer available. Applications not completed on or before June 30, 2026, will be assessed a delinquent fee equal to the renewal fee. An additional \$75 (in-state) or \$150 (out-of-state), for a total of \$150 (in-state) or \$300 (out-of-state).

Firms that continue to practice while delinquent may also be subject to fines in addition to the delinquent fees and will be required to complete a firm reinstatement application.

Below is some important information you should know as you prepare to renew your certificate of authority.

Professional Architectural Corporations:

The Professional Architectural Corporation Law (R.S. 12:1086-1101) establishes owner and director requirements, which must be met for

(continued on page 2)

Updating a firm POC

During renewal, firms may update their Point of Contact (POC), who will act as their agent to receive communications regarding their registration and to conduct business with the board on their behalf. To update a POC, a firm must do the following:

- Log in to the [LSBAE Licensing Portal](#).
- Click the "Firm Profile" tab at the top of the page.
- Click the blue "Update Point of Contact" button to access the renewal application.
- Confirm or update the POC information to begin the renewal application.

If a new POC is attached to the firm, an email message will be generated and sent to the newly designated POC.

- The new POC should then visit the [LSBAE Licensing Portal](#) and create an account (The User ID must be the e-mail address for the POC).
- Once the account has been created and their email address confirmed, the POC can log in to access the firm's record and complete the renewal application.

Renewals can be paid via ACH

The LSBAE now allows you to pay your firm certificate or renewal fees via ACH. ACH payments are electronic payments between bank accounts. If you'd like to use this option, please follow these steps once you reach the "Payment" section of your renewal application:

1. Choose "Pay by ACH"
2. Enter ACH Account Details:
 - a. Full Name
 - b. Email Address
3. Click "Search for your bank"
4. Click "Agree and continue"
5. Select your bank
6. Select your account
7. Click "Connect account"
8. Click "Done"
9. Click "Submit Application"

CHAIR'S REPORT

By John Cardone, Jr.

Board moving forward with new strategic plan, review of regulations

Having served as the Board's public member for approximately 25 years, I have had the opportunity to see the Board evolve in many ways, through changes in leadership, regulation, technology, and the practice of architecture itself. While much has changed, one thing has remained constant: the Board and staff's unwavering commitment to safeguarding life, health, property, and promoting the public's welfare. That mission continues to drive every program, decision, and action of the Board and its committees.

Over the past year, the Board has taken important steps to ensure that our work remains both relevant and forward-looking. One of the most significant initiatives was the development of an updated Strategic Plan. With the assistance of an outside consultant, the Board participated in a day-long planning session to evaluate priorities, challenges, and opportunities. The resulting plan will guide the Board's actions over the next three to five years and provide a clear framework for fulfilling our mission.

The Board has also undertaken a comprehensive review of its regulatory framework. Over the last two years, the Laws and Rules Committee, on which I have spent many hours as a member, has reviewed all the Board's statutes and approximately 90 percent of its rules. This has been a thorough effort to ensure our regulations remain clear, relevant, enforceable, and aligned with current practice. I encourage you to review Board Attorney Paul Spaht's article in this issue for additional detail on recent and pending rule changes, with more anticipated later this year.

In support of accessibility and public engagement, the Board's staff and webmaster successfully updated the website to meet WCAG 2.2 standards ahead of the April 24, 2026 deadline. This achievement reflects a continued commitment to ensuring that our services and information are accessible to all.

Additionally, the Board is preparing for an upgrade to its licensing portal and underlying software system. These improvements will include a refreshed interface and enhanced functionality, with implementation anticipated ahead of the November 1 kick-off of the license renewal season.

The Board remains focused on consistent and fair enforcement of the Louisiana architect licensing law and the board's Administrative code. This work is essential to maintaining public trust and ensuring that architectural services in Louisiana are provided by qualified professionals.

I would like to recognize the dedication of my fellow Board members and thank our Executive Director and staff for their continued professionalism and commitment to the Board's mission.

It is a privilege to serve the citizens of Louisiana, and we remain committed to carrying out our responsibilities with diligence and integrity.

Firm license renewals due now!

(continued from page 1)

registration with the board. The Licensing Portal has been designed to validate that your firm meets these requirements. Please be sure to have information regarding the number of shares authorized for your firm, the total number of shares the firm has issued, the total number of shares owned by Louisiana-licensed architects, the total number of directors, and the directors licensed to practice architecture in Louisiana.

Architectural-Engineering Corporations and Architectural Firms

The Architectural-Engineering Corporation Law (R.S. 12:1171-1181) and the board rules for architectural-engineering corporations and architectural firms require you to designate one or more supervising professional architect(s). The supervising professional architect is responsible for performing or directly supervising the performance of all architectural services provided by the firm. This means unrestricted, unchecked, and unqualified command of, and legal accountability for, the architectural services performed. Specifications, drawings, or other related documents will be deemed to have been prepared by the supervising professional architect or under such architect's direct supervision only when the requirements of the board rules have been fully satisfied. Only individuals **licensed** by the board who are **full-time active** employees of the firm and whose **primary occupation** is with the firm may be designated as supervising professional architects.

You can earn one (1) HSW continuing education hour by scoring 80% or higher on the [Louisiana Laws & Rules Quiz](#).

The board provides this quiz to licensees at no cost. It may be applied toward your continuing education requirements **once each calendar year.

EXECUTIVE DIRECTOR'S REPORT

By Tyson J. Ducote, Executive Director

Earlier this year, licensed architects and their points of contact were invited to participate in the 2026 LSBAE Licensee Satisfaction Survey. This biennial survey remains one of the most valuable tools we have for hearing directly from you, and the Board continues to feel that it is important to gauge your satisfaction with the services we provide related to your license and practice of architecture in Louisiana.

446 of you responded, and I want to thank each of you for taking the time. Your honest feedback is what allows the Board to keep getting better, and this year's results gave us a lot to be grateful for, along with a couple of clear places to focus.

Once again, we received a strong majority of Satisfied or Very Satisfied rankings across our core service areas:

- Customer Service - (89%)
- Application / Renewal Process - (95%)
- Website (www.lsbae.com) - (89%)
- Communications - (87%)
- Clarity of Licensing Requirements - (92%)

A few additional results stood out to me, and I wanted to share them.

Of the 280 respondents who hold licenses in other states, 54% said Louisiana's licensing process is better than the other jurisdictions they deal with, and 45% said about the

What you told us in the 2026 Licensee Satisfaction Survey

same. Only five respondents out of 280 said worse. That is a real testament to the staff, and several of you wrote in specifically to thank them. I want to echo that thanks publicly.

Of the 96 licensees who contacted the office in the past year with a question or request, 96% rated the handling Excellent or Good, with nearly 80% choosing Excellent. When you call or email, you should expect a prompt, professional response, and the data tells me you are getting one.

98% of you feel at least adequately informed about licensure and practice in Louisiana, with 73% feeling well or very well informed. We will keep the cadence and content of these communications coming.

I also want to address a couple of items where the survey pointed to room for improvement.

67% of respondents were unaware of the LSBAE Laws & Rules Quiz, which offers one free HSW hour for passing an open-book quiz on the board's laws and rules. This is the second survey in a row where awareness of the free hour has been low, and it is a benefit I want every licensee to use. A link to the quiz is on page 2 of this newsletter.

A few of you, particularly principals of larger firms and licensees who live out of state, flagged that the annual renewal process can be cumbersome when managing many

EXECUTIVE DIRECTOR'S REPORT

(continued from page 3)

licenses at once. Be on the lookout for a licensing system upgrade coming this year that will refresh the portal and give staff more flexibility to make administrative improvements going forward. The use of a Point of Contact also helps firms coordinate their architects' renewals, and I would encourage larger firms to take advantage of that option. That said, multiple payments processed at once is not something we are able to offer just yet. And while we will continue to look for ways to ease the process, the responsibility for being aware of and completing a renewal ultimately lies with each individual architect.

When we asked which areas LSBAE should prioritize over the next two years, the top responses were clear: enforcement against unlicensed practice (48%), clarifying and enforcing the boundary between architectural and engineering practice (46%), strengthening coordination with permitting authorities and code officials (42%), and providing clear guidance on laws, rules, and regulatory requirements (37%). The civil engineer exemption legislation that took effect last year was a meaningful step in that work, and these priorities will be in front of the Board as we continue our work and shape the next strategic plan.

On behalf of the staff and the Board, I would like to thank you again for taking the time to complete the survey. The information we learned from this is invaluable and will help the Board continue to move forward in its desire to provide first-class service to our licensees. In addition, it helps us safeguard life, health, and property, and promote the public welfare of the citizens of Louisiana through the built environment. As always, if you have any questions, concerns, or comments, please feel free to contact me.

Is your La. architectural license current?

Following the 2025 architect renewal cycle, which ended on December 31, 2025, it was noted that 108 architects still needed to renew their Louisiana licenses. The breakdown is as follows:

In-State:

- Architects – 19
- Emeritus Architects - 6

Out-of-State:

- Architects – 78
- Emeritus Architects - 5

Please verify the status of your Louisiana architectural license by using the [Find an Architect](#) search function on our website, www.lsbae.com.

La. R.S. 37:152(B), La. R.S. 37:153(A)(3), and La. R.S. 37:154(A) prohibit the practice and/or offering to practice architecture in Louisiana with an expired license. **An individual practicing architecture with an expired license is in violation of the licensing law and is subject to discipline.**

BOARD ATTORNEY'S REPORT

By Paul H. Spaht, LSBAE Board Attorney

Mandated Board regulation review has brought many changes

Updating board rules – As mandated by the legislature in 2024 and Governor Landry's Executive Order in 2025, the board has reviewed virtually all of its rules in accordance with stated criteria and has now amended or repealed many of them. More specifically:

Chapter 3 – The board has completed its review and amended most of the rules in Chapter 3 which is titled "Organization" and which pertains to the organization of the board. The amendments update the rules to align with current board practices. In addition, the board adopted Rule §319, which is new, to set forth more completely the powers and duties of the board. The amendments were published in the April 20, 2026 issue of the Louisiana Register and are posted on the board website.

Chapter 13 – The board is in the process of amending the rules in Chapter 13 which is titled "Administration" and which pertains to the board's administration of the licensing law. The amendments being proposed will make various changes including:

- Remove the word "stamp" when referring to an architect's seal.
- Specify that certain alterations defined as Level 1 by the International Building Code with a value exceeding \$125,000 are exempt from the licensing law if the applicant documents to the satisfaction of the State Fire Marshal that the work does not affect structural integrity or life safety.
- Establish that architects shall maintain evidence of their responsible control over work for a minimum of five years, including documents prepared outside their office.

- Expand the types of courses and programs that qualify for continuing education credit.
- Establish that continuing education credit cannot be earned for activities under one hour, while allowing fractional credit for activities exceeding one hour.
- Increase the record retention period from two years to six years for maintaining evidence of continuing education compliance.
- Remove the option for an in-state architect to contract with licensed engineers for work under the architect's responsible control, requiring the architect to personally perform all necessary calculations and maintain full responsibility for the work under the architect's responsible control, in order for an out-of-state architect to be deemed associated with the in-state architect on a project. The proposed amendments were published in the Louisiana Register on April 20, 2026, and are posted on the board website.

Chapter 15 – The board is in the process of amending the rules in Chapter 15 which pertains to names and titles. The proposed amendments consolidate for simplification the rules prohibiting misleading or confusing names and simplify and clarify the rules pertaining to Professional Architectural Corporations, Architectural-Engineering Corporations, Fictitious Names, Practicing in a Firm with Other Professionals, Unlicensed Persons, Intern Architect, Business Cards, Limited Liability Companies, Non-Resident Firms, and Architects Emeritus. Existing Rules §§1505-1515 are being repealed as unnecessary and obsolete. The proposed amendments and repeals were published in the Louisiana Register on January 20, 2026, and are posted on the board

Growing Local Pavilion, Farmers Market and Education Pavilion, a project emerging from the 2026 AERF award to the Tulane School of Architecture & Built Environment.

BOARD ATTORNEY'S REPORT

Mandated Board regulation review has brought many changes

(continued from page 5)

website. The board anticipates that the proposed amendments and repeals will soon be adopted.

Chapter 21 – The board is required by statute to conduct the election of the five architectural members of the Louisiana Architects Selection Board pursuant to rules promulgated by the board. Such rules are contained in Chapter 21, and the board has now updated and modernized those rules. The amended rules allow for email transmissions to submit nominations, distribute and return ballots and provide notice of election results to the candidates; provide for online voting; provide for the electronic tabulation of votes; clarify that only properly licensed architects residing in Louisiana are eligible to vote; and provide that an architect previously nominated but not elected will receive notice of any vacancy of the person elected. Allowing email transmissions and online voting will allow the elections to be conducted easier, faster and less expensively. The amendments were published in the April 20, 2026 issue of the Louisiana Register and are posted on the board website.

Chapter 22 – The board is in the process of amending several of the rules in Chapter 22 which pertains to Louisiana Architecture Education and Research Fund. The proposed changes will allow proposals for awards to include digital deliverables; clarify that failure to submit the final report will result in forfeiture of a portion of the award and for ineligibility for future awards unless good cause is shown; provide for exceptions to excuse non-use of funds received during the academic year received; clarify permissible and non-permissible use of funds awarded, and clarify when the final report must be submitted. The proposed amendments were published in the Louisiana Register on January 20, 2026, and are posted on the board website. The board anticipates that the proposed amendments will soon be adopted.

Updating the licensing law – SB291 of 2026, which amends the Architect Licensing Law, has been filed and is currently working its way through the legislative process. Most of the changes being considered are modeled after the NCARB Model Law, and the board is providing information in favor of the adoption of this bill. The amendments are intended to be non-controversial and simply update the licensing law to align with current board and NCARB practices. If the bill becomes law, it will be discussed in the next newsletter.

Congratulations to our new licensees by examination

The LSBAE is pleased to announce that the following individuals were licensed by examination between December 6, 2025 and May 8, 2026.

ENFORCEMENT REPORT

By Justin Owens, Deputy Director

LSBAE disciplinary and enforcement actions taken by the Board

One important function of the Board is to investigate alleged violations of the statutes and rules which regulate the practice of architecture in Louisiana. Substantiated violations result in disciplinary or enforcement action being taken either through a Consent Order or by Board Order following a formal hearing. The following are summaries of the disciplinary actions taken by the Board since the previous issue of our newsletter.

Expired License Practice:

Classical Roots Architecture, LLC (hereinafter 'Respondent'), an architectural firm (license #AF1055), was subject to disciplinary action by the Board for practicing architecture in Louisiana with an expired certificate of authority in violation of La. R.S. 37:145(A), La. R.S. 37:153(A)(3), La. R.S. 37:153(A)(6), La. R.S. 37:154(A), La. R.S. 37:158, and Board Rule §1705(R). On June 30, 2018, Respondent's certificate of authority to practice architecture expired. On August 30, 2024, Respondent submitted to the Board an application for reinstatement of its certificate of authority to practice architecture. On the application, Respondent answered 'Yes' to the question relative to practicing architecture in Louisiana without a current firm license in the last five years. On September 3, 2024, Respondent's reinstatement application was approved. Information subsequently received from the Louisiana State Fire Marshal's Office confirmed that Respondent had submitted one project for review in February of 2022. Respondent has entered into a Consent Order with the Board wherein it admitted to the referenced violation of the above laws and rule and agreed to pay a fine of \$250; pay administrative costs of \$328.93; to its supervising professional architect Michael P. Reid, architect license number 8494, successfully completing, with a minimum score of 80%, the Board's online 'Laws & Rules Quiz' for which no continuing education credit will be awarded, due upon the signing of this Consent Order; to the automatic and immediate suspension of Respondent's Louisiana architectural firm license if Respondent fails to comply with any terms of this Consent Order, which suspension shall remain effective until all terms are satisfied; to the publication of this Consent Order on the Board's website; to the printing of a summary of this matter in the official newsletter of the Board, Louisiana Architect, identifying Respondent by name, and to the reporting of this matter to the National Council of Architectural Registration Boards ('NCARB') Disciplinary Database, identifying Respondent by name.

Other Violations:

New Orleans Design Group, L.L.C. (hereinafter 'Respondent'), an architectural firm (license #AF0649), was subject to disciplinary action by the Board for making material misstatements on its renewal applications and renewing its certificate of authority in 2023 and 2024 despite not actively employing an architect on a full-time basis during those years in violation of La. R.S. 37:153(A)(6), La. R.S. 37:153(A)(7), La. R.S. 37:154(A), and LAC Title 46:I §1705(I). An investigation was opened based upon the Board's receipt of information which

suggested that Respondent had renewed its certificate of authority in 2023 and 2024 despite not actively employing an architect on a full-time basis during any of these years. Respondent has entered into a Consent Order with the Board wherein it admitted to the referenced violations of the above laws; agreed to not practice architecture in Louisiana in the future without first complying with all of the rules of the board, including the designation of a supervising professional architect who is actively employed by that firm on a full-time basis; agreed to the publication of this Consent Order on the Board's website; to the printing of a summary of this matter in the official newsletter of the Board, Louisiana Architect, identifying Respondent by name; and to the reporting of this matter to the National Council of Architectural Registration Boards ('NCARB') Disciplinary Database, identifying Respondent by name.

Disclaimer: Every effort has been made to ensure that the aforementioned information is correct; however, it should not be relied upon without verification from the Board office. Please note that the names of companies and individuals listed may be similar to other parties who have not had disciplinary or enforcement actions taken against them.

OSFM PLAN REVIEW CORNER

By: Joe Delaune, Chief Architect

OSFM plan review, new online system changes are underway

We all know that change is inevitable. From the OSFM perspective, codes evolve, legislative mandates come and go, and new methods of review to account for these changes need to occur. I've seen a lot of changes over the years! OSFM plan review started out reviewing large rolls of mailed-in construction documents on drafting tables. Only the NFPA 101 Life Safety Code and a couple of its references were applied, then it expanded to include ANSI A117.1 for accessibility, ASHRAE 90.1 for energy, and now the plethora of "I" codes. We'll save the Facility Guidelines Institute (FGI) discussion for later.

NEW ONLINE SYSTEM

One of the most revolutionary changes to this office was the implementation of our online plan submittal and review system in late 2015. This transformed the way we manage code enforcement and communications. Now, with the advancement of technology, it's time to change once again.

On July 1st, we will launch Phase 1 of a new online system. This new system is needed in order to further streamline the plan submittal process and to keep up with the evolving changes. It is designed to be more user friendly and to better interact with other sections of this office. Additional Phases will follow soon after initial implementation.

CODE CHANGES

Codes have multiplied over the years and have grown to address new requirements, authorities having jurisdiction over some of them have changed, and even some of the code publishers have changed, but I don't ever recall any code getting repealed - until now. Act 534 of the 2024 Session becomes effective on July 1, 2026, and with that, the NFPA 101 Life Safety Code will no longer apply for many occupancy types.

There will be a slight learning curve for us as old habits are hard to break. We've been reviewing for both code books for quite a while now, so the only new thing for us to learn is what not to cite on which projects. The two code book publishers have evolved over the years to the point where there are much fewer differences between their requirements as they apply to fire protection and life safety, but there are still a few curve balls.

Here's a recap of the applicable provisions that affect plan review:

1. The OSFM will continue to review all structures (architectural scope) for compliance with the fire protection, egress, and accessibility provisions of the Louisiana State Uniform Construction Code (LSUCC) as adopted by the LSUCC Council.
2. In addition, the NFPA 101 Life Safety Code (LSC) will continue to be applicable to Group I licensed Institutional occupancies and detention occupancies, all state owned or leased buildings, and Group E Educational occupancies.
3. No changes to the Fire Alarm, Sprinkler, Special Locking, or Suppression system review process or requirements. Only the later editions of the standards referenced by the IBC will be applicable.
4. The provisions of the LSC will apply to existing buildings that were permitted for construction prior to January 1, 2026, and the provisions of the IEBC/IBC will apply to alterations.
5. The ADA-ABA was repealed and changed to reference IBC Chapter 11, which further references the ICC A117.1 Accessibility Code

(continued on page 9)

OSFM PLAN REVIEW CORNER

OSFM plan review, new online system changes are underway

(continued from page 8)

– HOWEVER; the Louisiana State Uniform Construction Code (LSUCC) Council has amended Section 1102.1 of the IBC to add the following exception:

LAC 17:I.103 and 105; Adopt – Exception: Until such time the 2024 edition of this code is adopted for use, commercial buildings shall be permitted to comply with the requirements of the 2010 ADA Standards for Accessible Design as adopted by the United States Department of Justice.

Compliance with ADA-ABA will remain an option until the 2024 editions are adopted, this gives the Council time to properly study the requirements and amend the code as needed for Louisiana.

PLAN SUBMITTALS

Our plan submittal rate has been a bit lower so far this year as compared to previous years, however there were several very large economic development projects that kept us very busy and

there are more of these to come later on this year. As with most all projects, the construction schedules for these are fast paced and response times are critical.

The OSFM team of architects, engineers, and plans examiners typically manage between 30 and 40 projects at any given time with the goal of addressing them within 5 working days of submittal (note that addressing them does not guarantee an immediate response or approval). Approximately 55% of the submittals are currently being addressed within this time frame and over 90% within 10 days. The time required for a review is typically dictated by the scope of the project, however, the smaller scopes of work (affectionately referred to as the “mom & pop” projects) do not have an architect (POR) retained, they typically lack information, and therefore demand more time to review and consult with the applicant. The Plan Review Section also fields an average of over 600 phone calls and emails each week. This number spikes upon adoption of new codes or law changes, so I do expect it to spike again after July 1st.

OPEN POSITIONS

We currently have 5 architect plan review positions to fill. A continuous application is posted on the Civil Service website under “Job Seekers” and we will continue to advertise for interested applicants until our team vacancies are filled. Additional information can also be found on our “Louisiana Office of State Fire Marshal” postings on LinkedIn, Facebook and X (formerly Twitter).

As always, please let me know of any suggestions that you may have to improve our service to you. Thank you for your continued support and partnership with this office!
